SBT1000S Single Lane Swing Barrier Turnstile

SBT1011S Single Lane Swing Barrier Turnstile

(w/ controller and RFID reader)

SBT1022S Single Lane Swing Barrier Turnstile

(w/ controller and combination fingerprint & RFID reader)

The ZKTeco SBT1000S single lane swing barrier turnstile is an elegant, cost-effective entrance control system designed for wide lane.

The SBT1000S is a single lane swing barrier turnstile series designed for smooth and silent operation and draws very little power. It's made of stainless steel which makes SBT1000S highly durable.

SBT1000S tempered-glass barriers are normally held in a locked position, thus denying access to the secured side. Upon SBT1000S's reader (RFID and/or fingerprint) positively recognizing a user's valid access card or fingerprint, its barriers swing automatically, thus allowing users passage to the secured side.

During emergencies and power outages the barriers automatically swing, thereby ensuring users fast unencumbered exit to safety. This function is available during power off if fire control board and battery are installed

SBT1000S provides both security and convenience, all in a very durable yet elegant compact design.
